Focus on Huber Books

Bruno and Louise Huber are well known as founders of their system of astrological psychology, combining the best of astrology, depth psychology and their own research. There is now a substantial body of experience in the use of the 'Huber Method' in the German-speaking world, and Joyce and Barry Hopewell are doing an excellent job of getting them into print in English. There isn't room to list them all here, but this is a selection from their ever-expanding list:

Richard Idemon

£19.50 plus postage

Back due to popular demand! In this book, Richard Idemon teaches us how to look at the natal chart to gain rich, new insight into our deepest nature - the hidden agendas, childhood patterns and the belief systems that invariably shape our lives and relationships. Combining the symbolism of astrology, mythology and Jungian psychology, he teaches us how to break free of the entrenched attitudes that limit and restrict us. Above all, Idemon provides new depth and dimension to the understanding of the most important aspect of our lives - how we reach out and interact with others. He tells us that the important people in our lives are like looking glasses - mirrors of our unfolding process toward a fuller consciousness. By looking into these mirrors we can transform ourselves and thus change the relationships which are so important to us.
